# 

Feature	Angular	React	
Company	Google	Facebook	
Philosophy	<ul> <li>"Rather a platform than a Framework"</li> <li>Rich of Features</li> <li>Beyond Code: CLI, PWA</li> <li>Rarely a Case where there isn't a built-in solution</li> </ul>	<ul> <li>Minimalistic, UI Building</li> <li>Library, not a Framework</li> <li>Community needed for Routing, Http etc.</li> <li>Reusable Components</li> </ul>	
Code-Writing	Stricter Separation of HTML and TS	<ul> <li>Mostly everything is JSX and "Merged"</li> </ul>	
Ease of Learning & Getting Started	<ul> <li>"Complex" Setup Required</li> <li>Uses Typescript</li> <li>Separate HTML / JS</li> </ul>	<ul> <li>"Merging" HTML &amp; JS</li> <li>"Complex" Setup De Facto required</li> <li>JS &amp; JSX</li> </ul>	
Startup Performance How fast does the Web App load and becomes interactive?		Both are good.	
Runtime Performance  How fast does the App respond in the Browser?  Influenced by your code + mainly framework code			
Adoption and Popularity  Google Trends / npm / Jobs			
Framework Evolution	Both of them are Stable + Active Development		

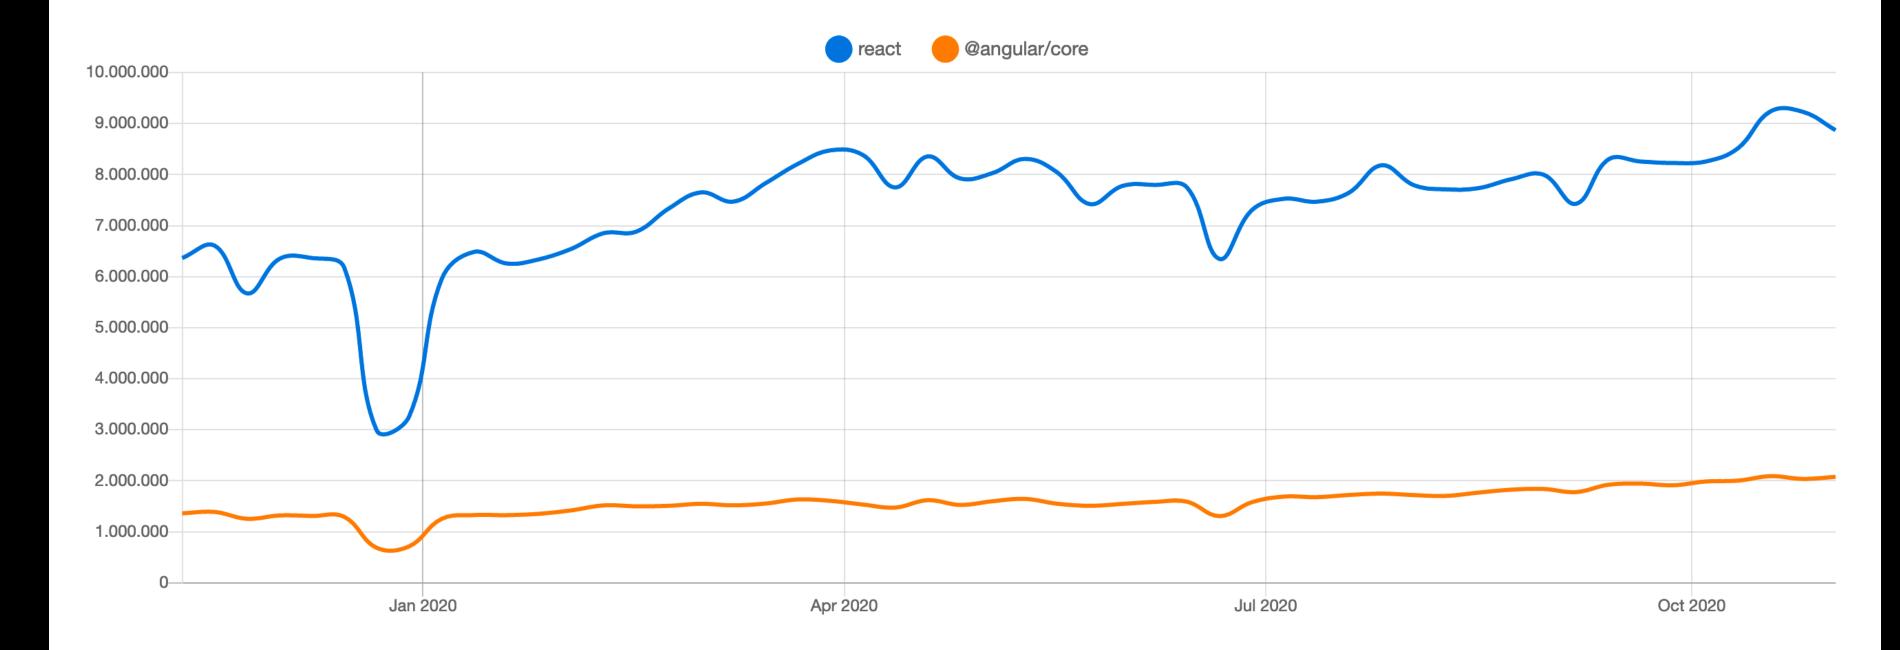

### react vs @angular/core

Enter an npm package... @angular/core ×

+ angular + vue + ember-source
